DETAILED ACTION

Finality of November 28, 2001 Action Removed

1. The finality of November 28, 2001 action is hereby removed due to the new references and rejections set forth herein.

Claim Rejections - 35 USC § 102

2. Claims 17, 18, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by *Miller 4,532,743*.

As concerns claim 17, Miller sets forth a panel comprising a frame (inclusive of members 30, 32, and 34)) defining at least one central area, the frame including a horizontal member 30 *adapted to be* coupled to a hinge member for hingedly connecting to another panel; and a plurality of material layers 20 and 22 received within the central area and held in place by the frame, the layers being movable relative to each other.

As concerns claim 18, Miller sets forth the frame being formed from aluminum extrusions. As concerns the extrusions joined by a weldment, the examiner takes the position that the process by which an apparatus is made (*Product by Process*) is not given patentable weight within an apparatus claim.

As concerns claim 20, Miller sets forth the sectional door panel, as advanced above, including the method of providing a frame defining a central area; inserting layers of material into

the central area, and to provide relative movement between the layers; and coupling a hinge member (viewed as inclusive of member 125) to the frame allowing the panel *to be hinged* to another door panel.

Allowable Subject Matter

3. Claim 19 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is an examiner's statement of reasons for allowance:

Structural limitations pertaining to the *layers* comprising a *polystyrene core* sandwiched between *polyethylene skin layers*, along with the other structural limitations are neither taught nor suggested by the prior art of record.

Conclusion
